

Net-Noggin Completes International Active Directory Audit

Granger, IN, - January 30, 2008 –

Net-Noggin has completed a contract with The Ministry of Education for a large Caribbean government to audit their Microsoft Active Directory Environment.

Under the contract, Net-Noggin has provided technical assistance to ensure the stability and health of their Active Directory Environment. The Ministry of Education plans to move to native mode for their Active Directory and to migrate their multiple Exchange Server clusters to Exchange 2007.

Net-Noggin provided auditing and best practice recommendations in the areas of time synchronization, DNS health and settings, Active Directory replication and other areas of TCP/IP configuration.

“We are pleased that the government leaders recognized our substantial Active Directory and Exchange experience. A stable environment at the Active Directory, TCP/IP and infrastructure levels is a must for a successful migration to Exchange 2007. With the completion of this audit and implementation of its findings, the Ministry of Education will enjoy a trouble-free migration of their Exchange Server clusters.” said Gary A. King, president of Net-Noggin.

About Net-Noggin

Net-Noggin provides network consulting services, focused on Microsoft products, including Exchange Server and Active Directory. Founded in 2001, Net-Noggin also delivers Internet Security and Web based services including web hosting and carrier-grade SPAM Filtering.
